S. Everett Abbott

Seattle, WA | (360) 731-3786 | severettabbott@gmail.com | github.com/AbbottEverett

Summary

Full-Stack Software Engineer with a drive for success and a passion for tackling difficult technical challenges that come with integration and application state management by constructing functional, quality code.

Skills

- React.js / Redux
- JavaScript (ES6) / jQuery
- Git / Github
- Amazon Web Services
- HTML5 / CSS3

- JSON / Rest APIs / AJAX
- Bootstrap / Semantic UI
- Functional Programming
- Object Oriented Programming

- Node.js / npm
- Express.js
- PostgreSQL / Knex
- Microservices

Projects

FlipGif Studio | *Capstone Project | React, Redux, Node.js, Express.js, Amazon S3 | April 2018 - 2 weeks*
FlipGif Studio is mobile-first, web application which allows users to create their own animated gifs and share them with their friends. Completed project end-to-end.
- Github Front-End: https://github.com/AbbottEverett/flip-gif-front-end
- Github Back-End: https://github.com/AbbottEverett/flip-gif-back-end
- Github Micro-Service: https://github.com/AbbottEverett/flip-gif-gif-service
- Live Demo: http://flipgif-studio.surge.sh/

Rubber Soul | *Group Project | React, Redux, Node.js, Bulma, Express.js | March 2018 - 1.5 weeks*
A React / Redux enabled ecommerce site for climbing shoes. Utilized agile methodologies and strong communication skills in order to effectively collaborate and execute on deliverables swiftly. Implemented the search features, user authentication and login, and a significant portion of the back end.
- Github Front-End: https://github.com/jdeam/rubber-soul-frontend
- Github Back-End: https://github.com/AbbottEverett/rubber-soul-backend
- Live Demo: http://rubbersoul.surge.sh/

GottaGoFast.Games | *Personal Project | Javascript (ES6), AJAX, Bootstrap | March 2018 - 1 week*
A website that allows users to find a random world record speedrun of a video game, given a specified length and/or desired console. Completed project end-to-end.
- Github Repo: https://github.com/AbbottEverett/gotta-go-fast
- Live Demo: http://gottagofast.games

Experience

Junior Front-End Developer / **Apprentice** | *Terevea, Inc. | Seattle, WA | July 2016 - October 2017*
- Was mentored by a senior software developer in front-end technologies.
- Contributed to the development of a React web app, utilizing HTML5, CSS3, React & Redux to create fully built-out screens from wireframes and user stories.
- Developed the home screen, signup process, and two additional application pages by querying data from a custom-build API and then turning that data into attractive visualizations.

Education

Certificate - Web Development | *Galvanize, Inc. | Seattle, WA | 2017-2018*
B.A. - Business Management | *Western Washington University | Bellingham, WA | 2011-2014*
